

Searching and Acquiring Information

Strategies: Active and passive listening immersion and reading.

Resources & Tools: Instagram, Twitch, YouTube, streaming platforms, and technical documentation.

Practical Application:

Watching coding streams and TV series to improve accents and mastering idiomatic expressions, as well as reading Python, JavaScript, and HTML5 documentation.

Creation & Production

Strategies: Interactive speaking and professional writing production.

Resources & Tools:

Gemini Live (IA).

Practical Application:

Interacting in real-time with Gemini Live to simulate job interviews in English (as a Junior Frontend Developer) and improve conversational fluency. Evaluating scripts and professional introductory emails.

My Personal Learning Environment

Personal Learning Network

Strategies: Collaborative learning and participation in digital communities.

Resources & Tools: Open-source communities and technical forums like Stack Overflow and GitHub.

Practical Application: Engaging in forums to troubleshoot software and hardware issues.

Management, Organization, and Gamification

Strategies: Time management, self-evaluation, and sustaining motivation (consistency).

Resources & Tools: Gamified productivity applications and Progressive Web Interfaces (PWAs).

Practical Application: Utilizing productivity tools like Habitica to structure and balance daily tasks with English exercises. Incorporating leisure activities (TV shows/Twitch) into the productivity framework as dedicated language immersion hours.
