

Subject: Application for Junior Frontend Developer Position – Inti Panesso Chavez

Dear Hiring Team,

I hope this email finds you well.

I am writing to formally submit my application for the Junior Frontend Developer position, as advertised by your esteemed organization. My interest stems from SENA's reputation for educational and technological innovation, and my commitment to contributing to its ongoing success.

Throughout my career, I have developed essential skills for this role, including advanced proficiency in HTML5, Python, and JavaScript. My analytical spark was first ignited at the University of Nariño, where I served as a monitor in the music informatics department. Currently, I am independently architecting and developing a Software as a Service (SaaS) platform, an ambitious project that continually tests and expands my ability to engineer robust and dynamic user interfaces.

My background, fortified by a professional certificate in Cybersecurity Analysis from Coursera and my current studies in the Technologist program in Software Analysis and Development directly at SENA, has equipped me with the ability to transform complex technical requirements into accessible, user-friendly digital experiences. I offer your institution not only technical expertise but also a proactive approach to continuous learning and a proven ability to collaborate effectively in multidisciplinary teams.

I am confident that my profile aligns with the standards of excellence your organization maintains. Please find my detailed resume attached. For further information or to schedule an interview, you may reach me at +57 333 2356966 or via this email address.

Thank you for your time and consideration. I look forward to hearing from you soon.

Sincerely,

Inti Panesso Chavez

Pasto, Nariño, Colombia

Frontend Developer & Software Technologist
